

# Ward Off The Spread of Germs & Viruses With High-Output Germicidal UVC lamps

For best practices, the Center For Disease Control (CDC) recommends the following daily precautions for preventing the coronavirus disease (COVID-19) caused by the novel coronavirus. Please visit: <https://www.cdc.gov/coronavirus/2019-ncov/specific-groups/high-risk-complications.html> for more information.

**In addition to standard daily hygiene practices suggested by the CDC, be proactive by adding our high-output UVC lamp to your HVAC system to purify the air, which will help improve overall indoor air quality and will reduce the likelihood of contracting any viruses.**

**Although we can't guarantee that someone will not become infected by a virus, a properly designed and installed UVC lamp, with enough microwatt intensity, will destroy airborne viruses that pass through the HVAC system.**

- Our high-output germicidal UVC lamps kill or deactivate airborne viruses, bacteria, germs and other bioaerosols that travel through your HVAC system and recirculate throughout your home.
- Our germicidal UVC technology is used to prevent the spread of viruses and germs in hospitals and other healthcare facilities.

**LIFETIME WARRANTY**

- Lifetime warranty on electronics, 2-year warranty on lamps
- 2-year long-life lamps

- Our high-output UVC lamps also sterilize airborne viruses, bacteria and germs as they pass by lamps, rendering them harmless and incapable of reproducing.
- Our high-output UVC lamps are **3.3 times more powerful** than standard lamps and will disinfect your air 24 hours a day naturally, without adding chemicals or sprays into your environment.
